ESCORTS SMART

## System we offer

### VESD

VESDA (an abbreviation of Very Early Smoke Detection Apparatus) is a laser based smoke detection system.

- Like a vacuum cleaner.
- Thousands of times more sensitive than conventional smoke detectors.
- Applicable where very early detection is crucial, high airflow is present or the environment is hostile.

## Labor management

Our Labor Management system software has a proven track record for reducing labor costs while decreasing employee turnover by rewarding efficiency, quality and safety.

- Optimize productivity by objectively measure employee performance against pre-defined standards.
- Analyze historical data for an accurate estimate of warehouse throughput
- Schedule the right balance of overtime, regular and temporary labor required for shifting demand.
- Achieve improved efficiencies, reduce overtime hours and increase customer service levels.

## Guard Tour Patrol System

We are engaged in offering a wide range of guard tour patrol system in Pune, guard patrol tour system that are suitable for use in guard patrol environment.

- Include I-button & RFID patrolling reader, RFID guard tour reader, download information button for check points and others.
- Procured from well-established vendors of the market and equipped with advanced microprocessor electronics that assure reliability.
- In user friendly operations, these Guard tour systems are known for rugged designs and better durability standards.

## Fire Suppression

Our hi-tech fire suppression systems are most suited for fixed installations like server rooms, data centers, control panels, sub-stations, battery rooms, generator rooms, libraries, archives, warehouses, etc.

- System totally eliminates the complex piping and storage cylinders required in case of other systems.
- Capable of alerting the concerned authority to contain the emergency.
- Shows the source of fire, triggers the alarm system and is provided with RS485, GSM/GPRS & Ethernet connectivity.
- We also offer clean agent based Fire Suppression solutions based on FM-200 / NOVEC 1230 for large control room & warehouses.

## Alarm & Emergency Management System

- Based on a system combination of smoke & gas leak protection, we have designed & installed customized safety systems for senior citizen homes.
- Besides providing gas leak & smoke detectors/alarm systems, a pendant provided to each of the senior residents enables them to alert the building security for special help (SOS).

## Access Control, Gate & Entry Automation, Perimeter Protection

- Controlling & tracking movement of personnel.
- Allow or deny individuals entry or access to information or location.
- Alarm handling & management, access controllers, card management, smart cards, biometric readers, visitor management, motorized gates, bollards and intrusion proof fence. Applications are for offices, banks, establishment, hotels, police and defense.

## Video Surveillance

- Object removal & tracking, pattern recognition, tampering, unattended articles, face recognition, loitering and license plate reading.
- Deeper investigation and control to enhance operational effectiveness.
- Highway safety, traffic management, schools, homeland security and hospitals

## Facility & Building

- Applications in large projects such as hotels & hospitals having extensive mechanical, electrical & plumbing systems.
- Systems linked to BMS typically represent 40% of a building's power usage. If lighting is included, it is as high as 70%.
- Linked to access control and other security systems such as closed circuit television (CCTV) and motion detectors.
- Fire alarm systems and elevators are also sometimes linked for monitoring.

## Project Management (SITC, EPC)

- Prepares a master schedule for all the project phases — contracting, basic / detailed / residual engineering, procurement, site installation, testing and commissioning.
- The resources — financial as well as manpower — are meticulously planned.
- Once the schedule is frozen in consultation with the client, it is monitored regularly in the initial stages and updated almost daily towards the project closure.
- In case the project is going out of schedule due to external reasons, techniques such as resource smoothing, schedule compression and phase implementation are frequently adopted.
- Project progress is quantified discipline-wise and reported weekly/monthly as required.

## AMC Services

- Rechecking of the installed security system in the establishment.
- Maintenance of the devices, control panels and replacement of the faulty components.
- Advising on the minimum stocks of spares to be kept.
- Regular system testing and performance logging of parameters. Preparing maintenance schedule for weekly, monthly, quarterly & annual checks.
- Planning & checking of comprehensive annual check-up. Emergency services during any breakdown.
- Up gradation & optimization of the system to install better technology and for meeting new statutory regulations.
- Expert services for special security devices & software
